

ALEXANDRIA RECANA

Libertyville, IL 60048 | 224-360-9984 | alexandria.recana@gmail.com

SUMMARY

Computer Science and Business graduate from the University of Colorado Boulder focused on the intersection of UI/UX design and front-end engineering. Experienced designing user flows, wireframes, and interactive prototypes in Figma, and shipping the resulting interfaces in HTML/CSS/JavaScript. Seeking a product design or UI/UX-focused internship / new grad role where research, design, and code inform each other.

EDUCATION

University of Colorado Boulder — Boulder, CO May 2026

B.A. Computer Science, Minor in Business (Leeds School of Business)

- Study Abroad Exchange Program, London — “Defamiliarization” design & research program (May–June 2025)
- Relevant Coursework: Human-Computer Interaction, Cognitive Science, Software Development, Algorithms & Data Structures, Product Development, Entrepreneurship & Innovation

SKILLS

- **Design:** Figma, UI component & design systems, usability-focused iteration
- **Front-End:** HTML, CSS, JavaScript, responsive design
- **Research & Process:** user flow mapping, low/high-fidelity wireframing, iterative prototyping, informal user testing
- **Tools:** Figma, Git/GitHub, VS Code, Canva

PROJECTS

UI/UX Design Prototype — Solo Project 2025

Figma · Wireframes · Interactive Prototype · CU Boulder coursework

- Redesigned an existing digital platform end-to-end, mapping the current user flow to identify where users dropped off between intent and action
- Built low-fidelity wireframes, then a full component library and a click-through interactive prototype in Figma
- Validated interaction design by prototyping before finalizing visuals, using click-through testing to catch usability issues static mockups missed

London Off-Season Football Tales — Front-End & UX Research 2025

HTML · CSS · JavaScript · Team of 2 · Study Abroad, London

- Conducted field research to shape an information architecture around real user needs
- Co-designed layout and visual direction, then built the majority of the responsive HTML/CSS front end, ensuring the experience held up on mobile — the primary device visitors used
- Presented the finished site; the project sharpened a personal focus on combining UX research with front-end execution

Ultimate Hangman Web Game — UI & Game Logic 2024

JavaScript · HTML · CSS · Team of 5 · Git/GitHub Workflow

- Owned core game logic and UI wiring, connecting keyboard input to visual state and real-time feedback for each guess
- Collaborated across feature branches with pull requests and code review, reinforcing a mental model of UI as a design problem rather than pure implementation

ADDITIONAL

- Chief Marketing Officer, Altis AI Ski Goggles student venture plan (2026) — led customer research and go-to-market strategy for a 5-person team
- Intramural soccer, CU Boulder
